SOURCE []

1. Along the road between Greiz and Weida (Landkreis Gera), several groups of about 50 men each were observed working on a stretch of about 4 km, testing the ground for uranium. Five of the workers carried Geiger counters. The groups were guarded by Russian military personnel.
2. In the area Sorge-Settendorf, large numbers of new workers are being put to work similarly.
3. Prospecting is underway at various points throughout the Landkreis Schleiz. As a result of the extent of the prospecting, the planned construction of a hospital near Schleiz was abandoned after a conference with the Wismut AG. The Thuringian Government is to build a hospital accommodating 750 beds in Saalfeld where uranium mining is in full operation.
